Leading **EDGE COMPUTING**

# Join a team of innovators at the Leading Edge of the Industrial IoT

“ADLINK gives an opportunity to work in a supportive environment. Working with a highly talented team enables me to develop new skills.”

Bindu Rao  
Software Engineer

ADLINK IST is a global leader in software platforms and tools for large scale distributed systems, the Internet of Things (IoT), Industrial Internet and advanced wireless communications. Over 25 years we have created a world-class software engineering organization employing some of the smartest innovators anywhere.

ADLINK IST's advanced software products implement open international standards to allow our customers to build solutions with their required platform coverage, performance, scalability, efficiency, flexibility, qualities of service and robustness. ADLINK IST's global customers service many market sectors, including: industrial automation, smart cities, utilities, healthcare, transportation, aerospace and defense. ADLINK IST's customers and partners feature many of the world's Fortune 1000 corporations and other leading “household” names such as Fujitsu, Boeing, Thales, NASA, Raytheon, Lockheed Martin, IBM, and Intel. We have been honoured with numerous awards and accolades including: twice named a 'Cool Vendor' by Gartner, Postscapes 'Must-Follow IoT Company', Sandhill 'Needle Mover', and IoT Nexus 'Power Player'.

We would like a candidate to have at least experience with some of the following skills; Java, Python, C++, C, Docker, Microservices. Experience in C would be a distinct advantage. As a Graduate Engineer you will work within one of our agile teams to deliver key new product features. You will take on all roles; coding, documentation, testing as required. What we offer: You will join an enthusiastic team of engineers working on state-of-the-art technology. The learning curve will be steep, but the environment you will work in supports this. On the job training and regular one-to-one meetings with your manager to set and monitor progress to your goals. An open plan office with a friendly working culture and dress attire that avoids ties at all costs. This role will include 25 days annual leave and the start date is flexible.

At ADLINK IST, our edge doesn't just come from our software, it comes from our people. We're looking for the best talent; people who take smart risks, thrive in diverse environments, inspire their colleagues and want to make a real impact on the world.
